Art Unit: 1621

The following is an examiner's statement of reasons for allowance: applicants' argument is persuasive. The prior art does not teach or suggest a method in which a feed stream of hydrogen and carbon dioxide is passed through a catalyst structure comprising a pore size of at least 0.1 μm . See page 7 of the applicants' remarks file on July 3, 2001 for further explanation of convective diffusion. The double patenting rejection is withdrawn since the copending application 09/492,245 requires a buffer layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to Jafar Parsa at telephone number (703)308-4615.
